OUR PROMISE - GUIDING YOU THROUGH THE OBSTACLES

COVID-19 has thrown a spanner in the works and it continues to cause uncertainty throughout the world. It can be difficult to understand the official updates and recommendations on how a business can operate during a pandemic. To reduce the risk of COVID-19 exposure in the workplace and to avoid the risk of a 14 day close contact operation shutdown, it is important to have risk management strategies in place including COVID-19 Workplace Surveillance Testing. This will further strengthen the protection within the business by identifying any concealed risks.

THAT IS WHERE WORK OPTIONS COMES IN!

Our team of experts will guide you through the obstacles, skillfully navigating to keep your business safe from the exposure of COVID-19 into your workplace. We can work with you and your team to ensure the risk management strategy in place is adhered to by ensuring your workers are tested for COVID-19.

WHAT SETS US APART

Reputation for Integrity, Quality & Service

Workforce Health Provider for 20+ years

Experienced Team and Qualified Pathology Collectors

CAN YOUR BUSINESS AFFORD THIS?

BENEFITS OF MANAGING COVID-19 WORKPLACE EXPOSURE RISK

- Minimise the risk of a 14 day close contact shutdown of the business

COVID-19 WORKPLACE SURVEILLANCE TESTING SERVICE

Work Options' Pathology Collectors can conduct COVID-19 Workplace Surveillance Testing onsite with Rapid Antigen Testing and PCR testing.

Choose either or both types of COVID-19 detection tests: Both tests are approved by the Therapeutic Goods Administration (TGA)

PCR Testing

- A polymerase chain reaction (PCR) test detects a specific organism (COVID-19) through a nose swab
- This test can detect fragments of COVID-19 even after the person is no longer infected
- Results are received overnight

Rapid Antigen Testing

- Antigen test via a nose swab, detects a specific viral antigen such as COVID-19
- Fast results in only 15 minutes and it is highly accurate

All of our testing is conducted by our qualified and highly experienced Pathology Collectors. The testing is conducted onsite at your workplace to quickly identify any exposure risks.

Testing can be performed from a car, at site entry or on-site. Results are sent directly to the worker and the employer.

Testing demand is high for this service as businesses want to ensure they are protected and can continue operating.

[Book in](#) early to secure your testing.
